*Playing
Your Way*

2019 Alhambra acoustics guitars programme has been developed during several years in cooperation with Maestros Luthiers and musicians.

Each individual guitar is totally handcrafted and customized by the musician who requested it.

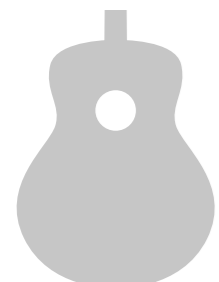

The range offers 4 different patterns: Jumbo, Dreadnought, Auditorium and 00.

Alhambra has created a workshop solely dedicated to the Alhambra Acoustic guitar line. These guitars will be built using Alhambra's vast experience from over 55 years of history building guitars.

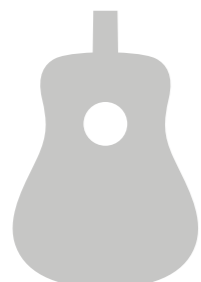

BODY SHAPE

Jumbo and Dreadnought are the most popular guitars that result in rich tones, with an excellent mid-range and defined trebles. The Jumbo and Dreadnought bodies are very comfortable and also provide a full spectrum of tone colours with a very versatile response.

They have a clear mid-range and well-defined trebles with strong basses. Ideal for vocal accompaniment and with a form of expression that inspires melodic lines, allowing the player to freely express themselves with either fingernails or a pick.

Jumbo

Dreadnought

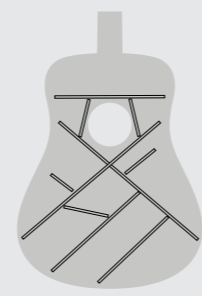

00

Auditorium

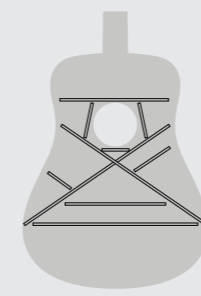

BRACING

They offer the rich tone and balance classic of Alhambra that allows you play on stage without losing the characteristics of the bass notes. They can be played with less force without losing any of the guitar's nuances.

T

(Not available for guitar 00)

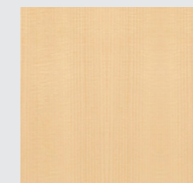

NS

The new Alhambra models offer the musician more versatility. They respond dynamically and show an excellent balance in all frequency ranges.
